Log periodic broadband yagi antenna
Series HyperLOG® 70xx - span 700MHz to 6GHz
Excellent LogPer antennas for mobile measurements and laboratory

Highlights:
- Optimal for usage with spectrum analysers for EMC measurement
- Incl. high-tech radom with modern, appealing design
- Excellent forward/backward ratio
- Freely alignable polarisation
- Excellent symmetry of radiation patterns
- Integrated 1/4" tripod socket
- Suitable for mobile use
- Made in Germany
- 10 years warranty

Calibration & standards:
- The log-periodic precompliance test antenna of the HyperLOG® 70xx series are suitable for interference field strength measurement. The specialized broadband characteristics allow measurements to be taken in the complete specified frequency range without switching.
- These antennas are suitable for measurement according to the following standards and procedures: CISPR, VDE, MIL, VG, EN 55011, EN 55013, EN 55015, EN 55022, MIL-Std-461.

Included with delivery:
- HyperLOG® 70xx-Antenna
- Typical calibration data with up to 533 calibration points (10MHz steps)
- Aluminum design carrycase with custom padding
- Sturdy, detachable pistol grip with "miniature tripod" mode
- Special Aaronia SMA toolset with over-torque protection

References / examples of proof:
- Airbus Deutschland, Germany
- EADS, Germany
- ATI Research, USA
- Motorola, Spain
- University of California, USA
- Los Alamos National Laboratory, USA

Made in Germany
Specifications

HyperLOG® 7025:
- Design: Logarithmic-periodic
- Frequency range: 700MHz-2,5GHz
- Max. transmission power: 100 W CW (400MHz)
- Nominal impedance: 50 Ohm
- VSWR (typ.): <1:2
- Gain (typ.): 4dBi
- Antenna factor: 23-34dB/m
- Calibration points: 183 (10MHz steps)
- RF connection: SMA socket (18GHz) or N socket using an adapter
- Dimensions (L/W/D): (340x200x25) mm
- Weight: 270gr
- Warranty: 10 years

HyperLOG® 7040:
- Design: Logarithmic-periodic
- Frequency range: 700MHz-4GHz
- Max. transmission power: 100 W CW (400MHz)
- Nominal impedance: 50 Ohm
- VSWR (typ.): <1:2
- Gain (typ.): 4dBi
- Antenna factor: 23-38dB/m
- Calibration points: 333 (10MHz steps)
- RF connection: SMA socket (18GHz) or N socket using an adapter
- Dimensions (L/W/D): (340x200x25) mm
- Weight: 270gr
- Warranty: 10 years

HyperLOG® 7060:
- Design: Logarithmic-periodic
- Frequency range: 700MHz-6GHz
- Max. transmission power: 100 W CW (400MHz)
- Nominal impedance: 50 Ohm
- VSWR (typ.): <1:2
- Gain (typ.): 5dBi
- Antenna factor: 26-41dB/m
- Calibration points: 533 (10MHz steps)
- RF connection: SMA socket (18GHz) or N socket using an adapter
- Dimensions (L/W/D): (340x200x25) mm
- Weight: 250gr
- Warranty: 10 years
With their log-periodic measurement antennas from the HyperLOG® 70xx series, Aaronia finally offers a very cost-effective alternative, which at the same time meets the highest expectations. In conjunction with the HyperLOG® antennas, every regular spectrum analyser becomes a fully professional directional RF measurement device within a few moments. Thus, a perfect "dream team" for EMC measurement in the laboratory or for outdoor use is at your disposal.

Due to their flexibility in polarisation, HyperLOG antennas can also be used as handy WLAN or Wifi antennas. Point-to-point WLan links or networks can be constructed easily using the full bandwidth up to 6GHz, achieving high throughput. Optimal for MMDS, ISM, CCTV and data/telephony transmission.

The HyperLOG® 70xx logper antennas come standard with a specially constructed, high tech radom housing. This housing has been constructed after intense research with the most modern computer technology in such a way that its shape, material and special coating have virtually no influence on measurements, not even in case of dew or other kinds of humidity collecting on the surface. Another important factor for Aaronia was the development of a radom with the lowest possible damping factor achievable. This turned out to be quite an adventure for our development team, particularly in the high GHz ranges. Fortunately, this adventure has been mastered resulting in a beautiful, elegant design, to the complete satisfaction of the development team. Our first test measurements even by far surpassed our guidelines!

The resulting antenna had the best possible protection against mechanical stress and environmental influence without sacrificing any of its performance.

Included with delivery: A sturdy aluminum design carrycase with custom padding for the antenna, cables and accessories. Furthermore, every antenna of the HyperLOG® 70xx series includes a detachable multi-functional pistol grip with "miniature-tripod" mode and an appropriate SMA toolset.
Recommended accessories for Aaronia Antennas

**Aluminum tripod**

Height adjustable, high stability. Recommended for use with HyperLOG 70xx and 60xx antennas. Max. height: 105cm.

*Order/Art.-No.: 281*

**1m / 5m / 10m SMA-Cable**

High quality special SMA cable for connecting any HyperLOG®-Antenna or BicoLOG®-Antenna with various test equipment like our RF Spectrum-Analyzer. You can choose between 3 different cables:

- 1m standard SMA cable (RG316U)
- 5m LowLoss SMA cable (especially low damping)
- 10m LowLoss SMA cable (especially low damping)

All versions: SMA plug (male) / SMA plug (male)

*Order/Art.-No.: 771 (1m Cable), 772 (5m Cable), 773 (10m Cable)*

**SMA to N Adapter**

This special high quality adapter allows operation of all HyperLOG®-Antenna with any standard spectrum-analyzer with N connector. Also this adapter is needed to connect BicoLOG® antennas to a SPECTRAN Spectrum Analyzer.

Especially massive, chrome-plated design. This adapter is usable for very high frequencies up to at least 18GHz. Physical dimensions are just 30x20mm. Nominal impedance 50 Ohms. Layout: SMA socket (female) / N plug (male).

*Order/Art.-No.: 770*

**Heavy multifunctional Pistol Grip (strongly recommended!!)**

Highly recommend for the usage of HyperLOG antennas. Quick and easy change of antenna polarization, perfect antenna handling (even with the more heavy HyperLOG 30100X).

*Order/Art.-No.: 262*
